The time period for reply, if any, is set in the attached communication.

### Office Action Summary

**Application No.**

10/552,745

**Applicant(s)**

KING ET AL.

**Examiner**

Thomas P. Noland

**Art Unit**

2856

**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 31 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
3. The filing date of the certified British priority application copy provided by WIPO was not discernable therefrom. However in view of the specific granting of the priority date by WIPO in the corresponding PCT application it is held that the requirements of 35 U.S.C. 119 for foreign priority have been satisfied.
4. Claims 4-10 are objected to under 37 CFR 1.75(c) or 37 CFR 1.436 (PCT Rule 6.4(a)) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, these claims have not been further treated on the merits.

Art Unit: 2856

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1 and 3/1 are rejected under 35 U.S.C. 102(e) as being anticipated by Ward, Jr. US 6,789,422.

Note abstract, Figs. 1-3 and col. 5, lines 12-62.

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garcia et al US 5,412,985 in view of Lysen et al US 6,526,829.

Garcia et al especially in the abstract, drawing, col. 1, lines 41-48, col. 3, lines 3-12, col. 4, lines 3-5 and 61-64 and col. 5, lines 27-65 discloses an analysis method substantially as set forth as noted in the written opinion of the corresponding PCT application, of record in the application file herein. It differs from claim 1 in that it does not disclose polar plotting as claimed. However such would have been an obvious expedient to aid in analysis since such plots are of known utility for such purposes and in view of the use of a polar plot for similar analysis in Figs. 12-13 of Lysen et al. Use of a reference

Art Unit: 2856

trajectory would be a further expedient to aid in analysis since such would ease comparison. The vibration and tachometer (speed) data appear to be acquired independently in Garcia et al.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show rotation monitoring systems and/or were cited in the PCT.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tom Noland whose telephone number is (571) 272-2202. The examiner can normally be reached on weekdays from 9:00 to 5:30.
